FEATURED PSYCHIC

Andrea

WHEN DID YOU FIRST DISCOVER THAT YOU WERE PSYCHIC?

I have always known and felt things that others didn't, and only realised I was 'different' when I reached puberty. When I was a child I assumed we could all 'feel' when someone was sad or down, even when there was a big smile on their face; or to "know" when something felt wrong and to be careful around that event/time/issue. I was instinctively able to talk to anyone of any class, age or race and be straight and honest, even when they didn't want to hear it, especially from a child.

WHAT ARE YOUR PSYCHIC TALENTS?

I am a natural empath. I feel other people's emotions and what is happening around them. This helps me guide them towards the correct path and help find answers and clarity. As a Clairvoyant, I can see and feel things that are yet to transpire or choices that are to be made. Empaths can be very clairsentient, being aware of our surroundings and environment at all times. For me, I can touch any object including a building and just 'know and feel' the energies that have passed through it. I can also connect with Spirit on a Mediumship level through my guide, who will let me pass on messages where needed.

WHAT PSYCHIC TOOLS DO YOU USE?

I don't need to use any tools as I can just 'tune-in', but I can use Tarot to strengthen the connection and confirm or bring more clarity if needed. I can also use Angel cards, Crystal Ball and Runes. Again, for me, it's about the energy that goes with the cards and flows through us all. Any tool just helps me strengthen what is already there, using and heightening the awareness I always feel. As a natural healer and adviser I am drawn to ancient tools, especially for Nordic or Druid descents. I am also drawn to the Egyptian and African divination arts.

CAN YOU TELL US ONE REMARKABLE STORY FROM A RECENT CLIENT?

I remember talking to a lovely lady who was surrounded by sadness, and had a lot of pressing issues that needed to be discussed to enable her to make a correct decision. I

kept seeing the colours burgundy and light blue, which had no apparent significance. As we talked about her upcoming house move in length and the need to push this along, the colours would just not go away. So at the end of the reading I had to let her know what I was seeing even without an explanation. She burst into tears and said that these were her son's football team colours. He had passed into spirit two years previous, and she still lived in the house where he grew up. She explained that she had been putting the move off, as she felt she was leaving him behind. She now 'knew' the move was the right thing to do. It proves to me that not everything I am given makes sense to me but it will to the one that needs to hear it.

WHAT DO YOU LIKE ABOUT READING FOR CLEAR PSYCHICS?

I love the people that work here. The 'family' feel makes it a much happier environment, which is really important to me. As I use my empathic abilities to 'tune-in', it's nice to know that a client is coming through having been already helped in a calm and polite manner. Having worked for Clear Psychics for many years, I have a lot of repeat clients. It's lovely to hear and feel how they are processing and moving forward. I find this work very rewarding and I can't imagine wanting to work anywhere else.

FROM THE EDITOR

The month of June is full of magic. The sun begins in Gemini and shifts into Cancer as it passes through the June equinox, giving us pause to stop and consider the balance of life. This is a time for growth and action. It's a time for mystical connections within ourselves and in the world outside.

One of our most experienced and beloved psychics, Andrea, is profiled this month. She shares deeper insights on psychic readings, and how she helps her clients find answers. Later in this issue, Andrea provides an in-depth look at pearl, June's birthstone.

We'll also explore the career and astrology of Nicole Kidman, who has quietly proven to be one of the foremost actors of her generation. What astrological and spiritual forces helped shape the current reality of this critically and commercially successful personality?

Chrissie, another one of our psychic talents, then takes us on a journey into the Gemini mind. What can we learn about our own relationships by learning about this dynamic (and sometimes baffling) sign?

As the first half of 2017 draws to a close, we're looking ahead with joy and inspiration. Our readers are ready to deliver personalized guidance, and our friendly support staff are always happy to assist in your journey.

Love and Light,

Lauren

Lauren X

When Nicole Kidman married Tom Cruise in 1991, her fledgling career had reached a tipping point. A breakthrough had come only two years earlier with her performance in 1989's *Dead Calm*. She must have known that falling for Cruise would take her to level of media exposure she hadn't previously imagined, but love has its own logic.

Kidman starred in a lot of big movies during her 10 year marriage to Cruise, including two more on-screen collaborations with her husband in Ron Howard's *Far and Away* and Stanley Kubrick's *Eyes Wide Shut*. But it wasn't until the pair divorced in 2001 that she really began to make her mark. That year, she snagged a Best Actress Oscar nomination for her performance in *Moulin Rouge*. The following year, she was nominated for her performance in *The Hours* — and this time, she claimed the golden statue for Best Actress. Since marrying Keith Urban in 2006, she has picked up two more Oscar nominations, for *Rabbit Hole* (2010) and last year's Best Picture-nominated *Lion*.

Now on the verge of her 50th birthday, Kidman has four children, a happy marriage, and a resumé that is enviable by any critical or commercial standard. So how can Kidman's astrological signature explain her longevity in the industry, despite massive tabloid exposure for decades? What spiritual forces are at work in her life?

Nicole Kidman was born in Honolulu, Hawaii on the 20th of June, 1967. This makes her a Western Gemini (on the cusp of Cancer) and a Sheep in Chinese Astrology. This combination immediately jumps out as a powerful set of tools for an actor. Gemini is the classic sign of multiplicity, and comes with an inherent ability to "occupy" different roles and characters. Sheep, meanwhile, are shrewd operators with a penchant for observation and fitting into the flock. Watching Nicole Kidman on screen, we can see her ability to "gel" with her cast members appear totally natural in a role. That's why she has enjoyed critical success that goes far beyond many of her commercially successful counterparts.

Kidman's moon in 2nd house Sagittarius is another aspect that speaks to her global success. It suggests that her emotional style is a blend of inspiration and pragmatism, and that her intuition has consistently led her into lucky spots.

If we're looking for raw star power in Kidman's chart, we find it in abundance. Jupiter sits directly on the midheaven in Leo, with Venus very close. This type of artillery in Leo gives a definite star quality, but when it's also positioned at the very top of the chart, you have the makings of a household name. Barring Nicole's deeper intellectual and intuitive qualities, her Leo energies alone would have probably taken her a long way. But in the context of her entire signature (especially her Chinese sign of Sheep, which helps her work consistently toward goals), she appears to have been destined for great things.

It's also worth noting that Kidman's sun, while in airy and dynamic Gemini, is in the very last degrees of that sign. Had she been born a day or two later, her sun would have been in watery and nurturing Cancer. Most astrologers give credence to the principle that planets on the cusp (especially the sun) will imbue natives a blend of qualities from both sides. Kidman has a very caring and nurturing side which often comes through in her roles, as well as in her personal life, where she closely guards the privacy of her four children.

Now that we know a little bit about Kidman's astrological signs, what can we say about the future? With five high profile films currently in production for release dates across 2017 and 2018, we could see Nicole Kidman move into a later phase of her career that puts her on par with screen legends like Meryl Streep and Judi Dench. Another Oscar win may not be far off for Kidman, but even if she decides to dial back her involvement in new projects, expect Mars and 12th house Libra to keep her hard at work behind the scenes, looking after her loved ones and championing the social causes she holds dear.

June Horoscopes

Check out today's horoscopes at clearpsychics.com/horoscopes.html

Aries

This is a month when your emotional outlook and interactions are going to come into particular focus. Where you live, who with and how, can also be important strands. Fortunately, the 6th can see an improvement in your financial circumstances. Your mind will also step up a gear from the 3rd, but choose your words carefully from the 9th. A relationship logjam is eased from the 9th.

Cancer

With Mars arriving in your zodiac sign for a six week occupation on the 5th, this is going to give you much more punch and a sense of purpose in your approach, but particularly from the 21st when the Sun and Mercury arrive too. You will need this, because from the 12th to the 21st, you may find yourself questioning your approach. But you can rekindle your belief as the month unfolds.

Taurus

The month begins with the Sun squaring up to the dreamy energies of Neptune. Some care may be needed when dealing with any financial issue which can influence your future or concerns anyone you know well. This is the time when you need to stay very clear minded in your approach. However, the planets conspire to help you hugely in this regard, in the last ten days.

Leo

That old saying of business and pleasure not mixing can hold particularly true in the first week. However, the 7th gives you an opportunity to think carefully about the people that you wish to be closely involved yourself with, and the 9th can be a further pointer in this regard. In fact, the rest of this month could see you deciding to thin out contact with those who are no longer truly relevant.

Gemini

When it comes to a professional aspiration, someone you encounter in the first week of this month may believe that you're not being realistic. Although this could dampen your spirits, try to see that actually they may have a point. June is a time when you need to be very earthy in your approach and seek out tangible results. But creativity is re-sparked from the 9th of the month.

Virgo

Someone you encounter in the first week of this month may prove to be a little bit unreliable, and especially linked to your work. Yet ironically, this can be a month when the contacts you have and the people you network with can prove to be incredibly important. Mind, the last four days of this month could throw up some intense scenes, and especially around your love life.

Free Chinese horoscopes! www.clearpsychics.com/chinese-astrology.html

Libra

Because you can be a very obliging person, the early days of June ask you to firm up your boundaries, for otherwise other people's expectations could be a drain on your need to be a free spirit. The great news however, is that Jupiter in your sign goes into forward motion from the 9th and your ambitions can also take a big step forwards in the last ten days of this month.

Capricorn

A situation that has proved unsatisfactory for some time can come up to the boil this month, but your desire to overcome any obstacles is going to be absolutely awesome. The trick however is to do so, but not in a way which proves destructive to key relationships. However frustrating someone may prove, nurture may still be a better approach than showing full-on frustration.

Scorpio

The lovely Venus moves into your opposite sign on the 6th. This is going to give you an opportunity to create some real magic in all sorts of involvements. However financially, there may be some stop/start moments between the 12th and the 21st. Any limitations can seem to be that much greater. Your passion and conviction about a subject can become much clearer as the month ends.

Aquarius

Naturally a risk taker? You could listen to your hunches early this month and actually do well. If you're not, try not to change the habit of a lifetime. June is a time which does give you a wonderful opportunity to demonstrate your talents, but only when you can back these up in a structured, practical and formulaic way. A secret opponent can show their hand late in the month.

Sagittarius

Your ruler goes into direct motion after tracking backwards since early February. If your future plans have seemed somewhat stymied since then, this change will help, though balancing your emotional expectations with long-term aims is still going to be a challenge. Saturn is also going to block both Mercury and the Sun between the 12th and the 21st, so relationships will require care.

Pisces

There's so much to go for this month and so much positivity. Your physical vitality is going to leap, and your personal expression can also flow, most of the time pretty well. Mind, a clash between the Sun and Mercury, and the restrictive energies of Saturn from the 12th to the 21st, could see your personal space impinged upon. But real progress is possible from then.

Romancing Gemini

By psychic **Chrissie**

The twins aspect of Gemini allows for a quick change between thoughts & ideas. This is one of the main Gemini traits. Natives of this sign don't like to be bored, and are always longing for the thrill of the chase. In fact, they often enjoy the journey more than the actual arrival!

Gemini is a mutable sign of the Zodiac, which means natives have a certain power to be flexible & adaptable. They're able to adapt to different situations quickly, and find creative ways to "go with the flow" — whichever way it's flowing, irrespective of the reasoning! Gemini is also an air sign, which symbolises communication & intellect. These qualities are prized by Geminis, who are naturally good at coming up with new ideas & projects. The fact that Mercury is Gemini's ruling planet injects a certain 'edge' to those born under this sign, making them sharp and witty. Geminis will often make remarks that cut deep, even when it's not intentional.

So how do these traits related to dating and romance? Even if

you're not dating a Gemini, what can this sign teach you? This is a very sociable sign. The typical Gemini is a people person, has plenty to say, and is always happy to communicate their ideas & thoughts to others. However, Gemini is also known as a flirty sign. Natives get on great at parties & in social settings. They enjoy being the centre of attention. Charm is another one of their strong suits, and it's easy to see why they are popular with all age groups.

At the same time, Gemini longs for constant change and is constantly seeking new stimulation. Since Gemini is constantly trying to steer clear of boredom, natives are often given to changing their minds about who they want to be with, or under what circumstances. This aspect of their personality can get them a reputation as a flirt. This is definitely a factor when dating a Gemini, or being a native Gemini and dating other signs.

Romantically speaking, there are certain star signs that fare better with Gemini than others. This doesn't mean that other star signs

won't get along — just that they will have to try a little harder to forge a relationship. Those born with the sun in Aries often match up well with Gemini, since both signs follow the desire to have fun and enjoy life to the full. Leo can also ticks the boxes needed for a good relationship with Gemini — as can Libra, which tends to bring out the best in both partners.

Although it may seem that having a relationship with a Gemini person can be difficult at times, there are great rewards to be had. Life should never be dull, and variety will always play a big part in the relationship. With Gemini, there are always new avenues to explore and new adventures ever on the horizon! There will be uncertainties and indecision from time to time; but if the astrological connection is strong in other areas, Gemini can truly be an inspiration for any sign of the Zodiac. Gemini can be incredibly loving and caring, and will put their heart and soul into making their partner happy. Maybe it's worth taking a chance?

THE HIDDEN POWER OF PEARL

By psychic **Andrea**
pin 7726

We've all heard of the age-old saying 'Pearls of Wisdom', but do we really know where that comes from, or why the wearer of pearls is deemed wise? In some Ancient cultures, pearls were a talisman of the arts, inspiration and spiritual perfection. Pearl is also seen as a feminine talisman. It is believed that the wearer is granted extraordinary foresight and protection from negativity and 'Evil Eye.'

The pearl is also valued for its extraordinary healing abilities: Boosting sexual energy, strengthening vision, and healing ear diseases. Pearl has long been thought to be very beneficial for your heart, lungs, kidneys, urinary system and liver.

Throughout history, pearls have always seemed to hold a magical alchemical quality. This is due to the long process of the Oyster, Mussel or Clam who organically transforms a small grain of sand into a beautiful translucent pearl within its shell. Painstakingly creating this perfect sphere takes a long time — sometimes 20 years or more. It could also be that ancients mystics and healers saw very little distinction between pearls and actual stones. In other words, the serene beauty of the Pearl made it a perfect complement to other, flashier gems.

Pearl is actually the oldest known gem — and for many centuries it was also considered the most valuable. Its distinct appearance and watery origins have created a rich tapestry of folklore and healing applications for centuries.

Pearl is the astral stone for the signs Gemini and Cancer, traditionally linked to the month of June. It is said that in early cultures that the pearl was born when a single drop of rain fell from the heavens and became the heart of the oyster. Pearls have even been called the 'teardrops

of the moon'. Of course, their shape strongly evokes the Moon and not surprisingly many cultures have made lunar connections with pearls throughout time. These connections are then further reinforced with the Moon's symbolic connection to our oceans and seas, where pearls are born. In ancient Vedic texts, the pearl is born of the Earth's waters and the Heaven's powers, fertilized by a flash of lightning. It is considered to be the daughter of the Moon. In more Western cultures, the pearl has astrological associations with the planet Venus and like pearls, the goddess of love came from the sea. Some other cultures believe that pearls were formed by passing angels through the clouds of heaven.

Over time, especially in the Western world, the pearl has become the symbol of purity and innocence. It is often sewn into bridal gowns, or worn as jewellery by the bride. However, in many other cultures (and for those of us who are more superstitious), pearls should never be used in an engagement or wedding ring, or indeed given as a gift to anyone. This is because they symbolize tears, and are believed to bring sadness. Brides have long been cautioned against wearing pearls on their wedding day, lest they bring tears to the marriage.

Confused? With such an ancient beautiful gem stone, there will always be conflicting and diversely different views — especially across different cultures, religions and time. But no matter what your reasons for connecting to this beautiful gemstone (beauty and wisdom, healing powers or purity, good fortune or wealth, or even love), you can be sure you are wearing an exquisitely beautiful gem that is rich in history, tradition and folklore.
